NEXT-GEN INNOVATION:

HYBRID WEB DECK® MEGATRUSS AND CATENARY WIRE SYSTEM

YOUR TRUSTED PARTNER FOR ACCESS AND NETTED SAFETY SOLUTIONS

WEB Systems® International is dedicated to transforming work at height. Our innovative solutions - **WEB Deck®**, **WEB Net®**, and **WEB Catch®** - are designed to enhance safety, reduce costs, and maximise efficiency for projects globally.

KEY FEATURES ACROSS PRODUCTS

- ❖ Modular, lightweight, and durable systems.
- ❖ Customizable solutions for unique site challenges.
- ❖ Rapid installation and dismantling to save time and labor.
- ❖ Global network of partners ensuring seamless service delivery.

OUR FLAGSHIP PRODUCTS

Solutions Tailored for Every Challenge

WEB Deck®

A Suspended Under-Deck Access System - provides safe, stable, and reliable access for construction, inspection, maintenance, and repair tasks.

KEY FEATURES

Lightweight (20 kg/m²), proprietary hook & clasp system, and tidal-ready options.

WEB Deck® Megatruss System

It is a flexible suspended access platform with pre-engineered trusses for complex geometries, offering quick assembly, rigidity, and integrated safety features for efficient and secure access at heights.

WEB Deck® Catenary Wire System

It is a standardised suspended access solution featuring high-strength steel wires and modular components for easy installation. It prioritises adaptability, safety with secure attachments for enhanced functionality.

WEB Net®

A Stable 'work positioning' or 'walk-on' Netting System designed to offer safe and reliable access for maintenance teams to carry out lighter tasks at height.

KEY FEATURES

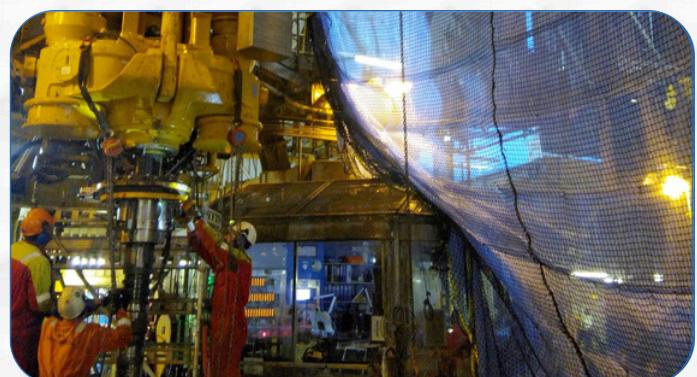

High-tensile polyester, flame retardant, UV stabilized, UDL: 1.5 kN/m².

WEB Catch®

Multi-Level Dropped Object Protection System that safeguards the working crew from free-falling construction debris.

KEY FEATURES

High-tensile polyester, galvanized steel, or Dyneema.

WHY CHOOSE **WEB SYSTEMS?**

▪ Enhanced Worksite Safety

With falls from height accounting for 51% of construction fatalities (UK HSE 2022/23), our cutting-edge systems are designed to minimize risks and provide superior protection for workers at height.

▪ Increased Productivity and Savings

Our innovative solutions simplify access methods, saving time and reducing costs. Clients report up to 40% faster project completion and significant savings.

▪ Innovative Custom Solutions

We collaborate closely with clients to design customised systems that deliver maximum safety, stability, and efficiency for unique project needs.

INDUSTRIES (AND APPLICATIONS)

BRIDGES

HELIDECKS

PIPERACKS & JETTIES

PIERS

OIL RIGS

STEEL PLANTS

HIGH-RISE CONSTRUCTIONS

VIADUCTS

COUNTRIES AND REGIONS WE OPERATE IN

Australia, Canada, India, Indonesia, Ireland, Malaysia, Norway, Qatar, Singapore, South Africa, South America, South Korea, Thailand, UAE, UK, USA.
